

Model : PDC-SW-GMPT-METAL-BK

Item: JR03

This device is intended to be installed in furniture for the purpose of supplying power for lighting and other Listed electrical devices that are integral to the furniture.

These devices are cord connected power distribution units consisting of a metal enclosure with receptacles and circuit breaker.

The units are provided with a Listed 15 A, 125 V, three conductors grounding type power cord.

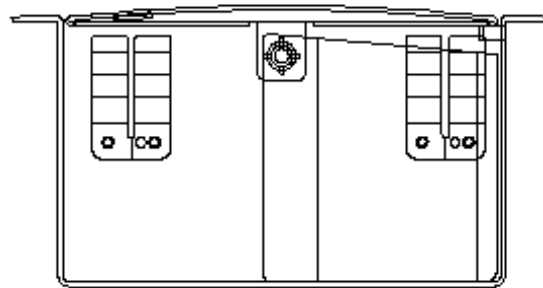

They are intended to function as a temporary extension of a branch circuit.

Installation:

Step 1: Decide the location of installation and circle a diameter of 130 mm OD (5.11”).

Step 2: Cut the 130mm (5.11”) hole.

Step 3: Press the unit into the hole. Make sure the side clips fit securely and the lip (bezel) contacts the furniture surface.
